

SECONDARY CABLE ASSEMBLIES

L-823 Secondary Leads - Style 7

Ordering Information:

Base Part # BE20R

Length 1.27 mtr

Application

BILDAL Secondary Receptacles are used for custom installations that require a connection to secondary power circuits using either a factory molded L-823 Style 7 (Straight Design) or a Style 8 (Ball Design) female connector.

Design

BILDAL Secondary Receptacles are molded in thermoplastic rubber for superior durability and dielectric strength. Style 7 connectors are designed to mate with Style 1 or Style 6 factory molded plugs, as well as an in-field Style 4 or Style 5 spliced plugs. They are rated 20 Amps and 600 Volts.

Approvals

BILDAL Secondary Receptacles are approved to the FAA L-823 specification and are certified by ITS Testing Labs to FAA Advisory Circular 150/5345-26.
