

# PRIMARY CABLE ASSEMBLIES

## L-823 Primary Leads - Style 2 and Style 9

### Ordering Information:

Base Part # BE10P/BE10R

Length 65CM

### Application

BILDAL Primary Leads are used for custom installations that require connection to primary power circuits using a factory molded L-823 Style 2 male, or Style 9 female connector. Both connectors are molded to #8 AWG Airport Lighting Cable.

### Design

BILDAL Primary Leads are molded in thermoplastic rubber for superior durability and dielectric strength. They can be manufactured as blunt cut pigtailed, or as extensions. Both Style 2 and Style 9 connectors are rated 25 Amps and 5,000 Volts.

### Approvals

BILDAL Primary Leads are approved to the FAA L-823 specification and are certified by ITS Testing Labs to FAA Advisory Circular 150/5345-26.
